**Your challenge: To play the ii-V-I through all 12 keys,
note-perfectly, three times in a row.
If you mess up - start again!**

Difficulty level = Very advanced / borderline insane

That's all 12 keys!

"Why is this important?"

These are some of the most advanced Jazz chords you could ever play. Rootless ii-V- I is already advanced... but then to make the V7 chord altered makes this really sophisticated.

However this voicing pattern will absolutely pay off if you take the time to learn it.

Tip: There's a certain feel to this progression which you can learn.

As you go from ii - V7 alt ($Dm^7 - G^7_{alt}$) - this is what happens:

Your top two notes (C + E) move down a half-step.

The note below (A) moves UP a half-step.

And the bottom note stays the same.

The trick to this progression is to learn the feeling of this hand movement.
